

COVID-19 offer:
Free online order
No strings attached

Relief for restaurants - the transformation to mobility and online ordering during the global pandemic

COVID global threat

Restaurants are living or dying based on their ability to do takeout and delivery. And they just can't pay the high fees that 3rd party delivery platforms charge them. The dilemma is how to transform a restaurant to be truly mobile with customer friendly online ordering that lets a restaurant build their own brand, not someone else's. Restaurants that cannot adapt and transform may not survive.

Our technology

Tabit develops best-in -class solutions to help restaurants transform their business to be mobile, more efficient, and more profitable while continually focusing on enhancing the customer experience. Tabit's cloud-based Mobile First Restaurant Operating System was designed from the ground up to be truly mobile. It has restaurant Point-of-Sale and back office functionality at its' core and utilizes tablets and smart phones as the primary touch points. Additional software modules provide a full suite of functionality for all restaurant needs including guest management and online reservations, kitchen, real-time monitoring, business intelligence and an Online Ordering Platform for takeout and delivery.

Customers Order Online through the restaurant website or social media

Customers pick up curbside in store, or direct delivery service

COVID-19 OFFER

To support restaurants in the USA during this global pandemic, we are offering a Free Online Ordering platform for 6 months—no strings attached. Tabit Order is an online, customer facing, ordering platform for takeout and delivery.

We will waive all one time setup fees and will not bill for monthly software fees for six months.

No strings attached means you can return the loaner iPad and discontinue use of the software at the end of the 6 months with no fees or charges.

Provide us your menu and we can get you up and running now!

Partner and Tabit will waive all one-time setup fees and will not bill for monthly software fees for six months
