TabitInsight

Business Intelligence System

Provides the latest analytic, big data, and machine learning capabilities – highlighting key insights about your business. Features in-depth analysis of your menu performance, labor costs, and overall business performance.

Management Insights
TabitInsight provides deep measurement and analysis capabilities of your menu sales, employee efficiency, and overall business performance.

Your Business Intelligence Center
TabitInsight contains reports compiled especially for your business by our industry specialists, based upon our thorough analysis, addressing specific market needs. Reports can further be customized independently to suit any ad hoc querying needs.

Easy Access to Data
Reports are easy to view and can be compared across a variety of data points, enabling owners to spot trends and see which day of the week/hours of the day bring in the most sales, and are most profitable.
